Vince  
Whitney

The main climate factors expected to influence the 2023 Atlantic hurricane activity are the ongoing El Niño and the warm phase of the Atlantic Multi-Decadal Oscillation, including record-warm Atlantic sea surface temperatures.

# 2019, 2022, and 2023 Hurricane Preparedness and Mitigation poll

The annual report surveys people from 61 of Florida's 67 counties.

## How vulnerable do you feel to damage from a hurricane, related tornado or flooding hazards?

- In 2019, 2022, and 2023, over 40% of Floridians responded the government should implement stricter elevation plans for homes in vulnerable areas.
- A new option was added to the 2023 survey, "Government should consult scientists and implement their recommendations." 53.1% of respondents selected that option.

**With an updated 60% chance of an above-average hurricane season, it is imperative to:**

**Stay informed**

**Listen to local officials**

**Understand your local risks**

**Gather essential items**

**Avoid potentially dangerous situations**
